

# BQ BULLETIN

Instituto Antoine Henri Becquerel | January 2017

## Las breves del BQ.

### Diciembre y Enero pensamos verde.

- Pensamos, realizamos, creamos, jugamos verde. Nuestra filosofía estuvo enfocada en cuidar el medio ambiente.

### Eventos Especiales

- BECMUN.
- Feria de las ciencias. Global Warming and Climate Change.
- Recital de Frozen.
- Festival Navideño.

### Sección Especial de cuentos en Inglés.

- Publicación en este número de los mejores cuentos navideños.

### Próximos Eventos

- Phonemical Awareness - Concurso Kindergarten.
- Spelling Bee - Concurso Primaria y Secundaria.
- Presentación de ballet y el coro.

“Conocimiento, amor y sabiduría”

“Knowledge, Love and wisdom ”

# Editorial

## Dear student BQ:

En este número te presentamos: nuestras actividades verdes y navideñas. Además de los ganadores del concurso del cuento.

**“Reading is a protest against the insufficiencies of life”**

**MARIO VARGAS LLOSA**

**“Leer es protestar contra las insuficiencias de la vida”**

**MARIO VARGAS LLOSA**

El grupo editorial presenta en este número a un peruano escritor llamado: Mario Vargas Llosa. Es evidente, la sabiduría que proyecta en cada una de sus palabras dentro de sus ensayos, novelas, críticas y más. Pero, lo más importante de este autor es el gran talento que proyecta dentro de sus obras literarias.

Además te presentamos a potenciales escritores, quienes con motivación, inspiración y una pasión evidente por proyectar sus ideas redactaron cuentos en Inglés.

# BECMUN 2016

A principios del mes de Diciembre al división escolar de Secundaria programo el evento BECMUN.

Los estudiantes fueron representantes de diversos países. El evento se llevo a cabo en dos días, en el cuál se discutieron temas sociales, políticos y económicos. Además, se le otorgo reconocimiento a los estudiantes más sobresalientes en esta dinámica.

## Feria de las Ciencias - Global Warming and Climate Change

El evento se llevo a cabo a cargo de la Profesora. Hilda Peña en colaboración con la Dra. Brenda Ávila. El evento comenzó con un simposium en donde la especialista Dra. Brenda abordo el tema del cambio climático y el calentamiento global, para después permitir a los estudiantes a que participarán con sus presentaciones teóricas.

Una vez que la parte informativa concluyó los alumnos pudieron aprender de manera interactiva con un sinfin de actividades planeadas, desde experimentos básicos hasta complejos. Evidentemente aquellas actividades que se lucieron en popularidad fueron los juegos de mesa, y los experimentos.

## Recital de Frozen

La cita fue en la Sala de Artes del Bosque de Tláhuac. El evento fue llevado por las pequeñas de Ballet en colaboración con el coro musical del Instituto. Sin duda alguna fue una de las mejores noches del 2016. Las mamás y papás que asistieron se pudieron percatar que sus hijo(a)s han desarrollado habilidades socio afectivas.

## Evento Navideño - La posada de Kindergarten

Los pequeños celebraron la navidad con su típica posada, en la cuál estuvieron participando en la piñata.

## Evento navideño - festival

Las tres divisiones escolares se dieron cita, para concluir el ciclo escolar con el festival navideño. Hubo participación de números musicales en inglés y Español, y además de la pastorela tradicional.

## The story of Mario Vargas Llosa.

Mario Vargas Llosa was born in 1936 in Arequipa, Peru's second largest city. During his childhood in Cochabamba, Bolivia, and Piura, a city in the north of Peru, he believed that his father had died. However, this was a lie told by his mother to conceal their tortuous separation. The truth emerged when, in 1946, his father appeared unexpectedly to take him away from his mother's parents, moving with him and his mother to Lima. This revelation signified an abrupt change in Vargas Llosa's life, from the pampered upbringing of a feminine environment to the hostile treatment of an authoritarian father. At his side, he was to discover fear, injustice and violence for the first time.

During these years in which he left his childhood behind, devouring the works of Dumas and Victor Hugo, the political climate in Peru was a reflection of Vargas Llosa's home life. The dictator Manuel Odría rose to power in 1948 and over the next eight years, while Vargas Llosa studied law and literature at the University of San Marcos, he imposed rigid controls on social life which stifled individuality, engendering scepticism, defeatism and frustration among Peruvians. This period later inspired his novel *Conversation in the Cathedral*, published in 1969.

Name: Jorge Mario Pedro Vargas Llosa

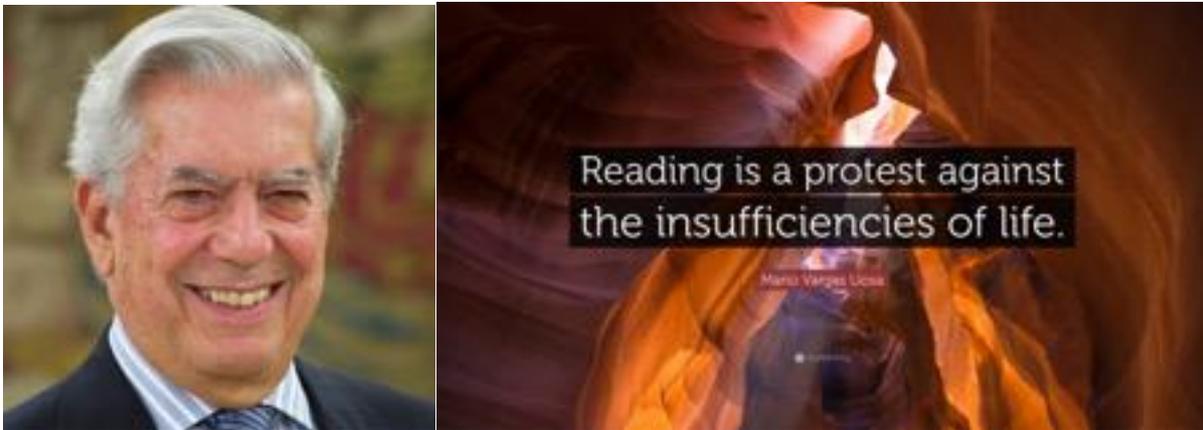

DOB: March 28, 1936

Place of Birth: Arequipa, Peru.

Occupation: writer.

Notable awards: Miguel de Cervantes Prize (1994).

Nobel Prize in Literature (2010).

# TALES

## My pet

by Max Flores G.

Once upon a time, there was a boy who had lost his pet named Lucero. He was so sad because the days had passed and he couldn't find it, so he decided to make ads with its photo and put them in every storage of his colony and offered money to who could find it.

One day a family found Lucero and brought it to Juanito, besides they didn't want the money. Juanito went to his house very happy with Lucero.

He decided to spend a lot of money in some things for Lucero, like a house, a bed, a plate to eat, a necklace with a belt to go to take a walk together and wouldn't go away again!

# Best Friends

by Valeria Mejía E.

It was the first day of school where two eleven-year-old girls met. When they went together to the recess they sat together and wondered about their other school and how they were. The next day, the friend started eating together and they started to play what they liked the most. Every time they went out to play, they would laugh and play. When they returned to the classroom they would pay attention to the teacher, but they would chuckle or make questions.

When it was Saturday or Sunday they talked by facebook and video calls. When they returned from the weekend, they asked each other about what they talked by facebook. When it was someone's birthday, they always wore a small gift like earrings, necklaces, or bracelets that were always from the first day. They were the best friends since then. They knew they loved and supported each other so much. Since then nobody separated them. That's when they became best friends.

# The first time travel

by Aldo E. Cortés

It's a story about a journey through time. John is a scientist, he invented a time machine. One day, he and his friend Marty tested the time machine, so they traveled to 1992, and then they returned.

They decided to keep the time machine in secret because it could be stolen.

Later, they tried to travel to the future, they did it but something wrong happened, the time machine ran out of plutonium. John and Marty were worried because they had been caught in the future. There were flying cars and other things, so they had to use one which made the time machine fly again and then they could get back to 2017. They needed gasoline and they had it so they flew.

Already in the future, John and Marty were figuring out how to return and went to some laboratories to look for plutonium, they were confused because they didn't know if they should ask for it or to steal it, but they asked for it and finally when they got it they could get back home.

The end.

# Eternal Love

By Grecia Hernández

Everything started with a friendship request. He just needed some help about a crush who just played with him, she nicely accepted to help him, but she didn't know that that love she wanted wasn't worth it. When she received, his message asking for help, she thought that she loved him, and that he wanted to get her back. Later, she realized that the one he loved didn't love him, but play with his feelings and looked for him. When this happened, she couldn't do anything about it, because he was still in love with her, and the only thing she could do was helping him without telling him he was being fooled.

After some time, they kept talking, but she felt weird when doing it, because she was in love with him, but she couldn't tell him. He just wanted her help. Once, he disappeared for some days, and worry, she thought that she had to look for him or ask his friends if they knew anything about him. Some days later she got a text which said juts "Hi", as if nothing had happened. She asked him why he had disappeared, but he just replied: *"I had some things to do, that's why I wasn't online during this time."* She said it was ok, and that he could tell her anything he wanted to. He just thanked her.

Time passed by, and she still had feelings for him, but she didn't tell him because she thought she would hurt him. One day, she was sitting on a seat at school and told her friends that she was falling in love with Ray. Her friends were shocked. That night, at 9:30pm, she got a text from him where he asked him how she was. She told him that she was just chatting for a little while. Then, Ray asked her how she

was doing about the love stuff, and she answered that not so good, because someone had fooled her for a long time, and he said that she deserved someone better than the rest.

After that, Ray asked her if she wanted to play truth or dare, and she accepted. After playing a little while, he asked her "*What would you do if I told you that I like you?*" and she answered that it would make her the happiest girl in the world. Then, they confessed how much they loved each other. That night, they kept saying lovely things and went to sleep at 4am.

She couldn't sleep, even though she had classes on the next day, and her birthday was coming. Ray knew this fact, so one day before her birthday, he asked her what she wanted to do, but she didn't know, so he suggested to go to the movies to watch *Dead pool*, and she accepted.

Her birthday had arrived. He congratulated her, and he picked her up after school to go to the movies. When they got there, he was showing her something and suddenly he kissed her. She was so happy, because she was kissed by the person she liked. He kissed her again in a very lovely way. After watching the movie, Ray took her back home, but before leaving her, he told her he had a question to ask, and he did... "*Would you want to be my girlfriend?*" and she happily accepted.

Sometime later, her mother tried to get them apart, because she thought he wasn't meant for her, but they kept dating anyway. To help them, her sister talked to her mother to explain her that those were different times so she couldn't make the fall apart. She talked to Ray too, and said that she trusted him and thanked him for loving her sister that much. Now they could date without any problem, if they respected some schedules.

They are about to celebrate their first anniversary. She wants to get into high school, and he supports her to follow her dreams. They have so many plans together and want to be happy in their way. They love so much each other, and their main goal for now is to keep going and to success.

This ends with an eternal love which nobody wants to end.
